

Vehicle Drive Recorder

Helps avoid collisions and promote safe driving.

This product is the most discreet and feature packed on the market. An essential dash cam that helps avoid collisions, gives lane departure warnings and has a parking monitoring mode. HD quality filming accurately records vehicle licence plates as well as the entire drive. Available as front or dual (front and rear) configuration.

Front facing camera

Rear facing camera

Key Features

- Built in GPS and WiFi.
- Dedicated App (available via iOS and Android) for reviewing captured footage.
- Advanced audible forward collision and lane departure warning systems.
- Auto voltage cut-off prevents car battery drainage.
- Whilst parked, the device automatically records images when motion is detected.
- Available as front or dual (front and rear) configuration.
- Professionally installed by a trained Technician.

Benefits

- Helps provide evidence in the event of an accident.
- Records both audio and visual footage.
- Records damage even while the car is parked.
- Footage can be replayed immediately via the App.
- Helps safer driving with in-built audible warning systems.
- Helps to report bad drivers, hoons and illegal activity.
